

Title (Heading 1 style, Arial 12 pt, bold)

F. Author1, S. Author1, T. Author2 (Heading 2 style, Arial 11 pt, bold)

¹First affiliation, address (Heading 3 style, Arial 10pt, italic), ²Second affiliation, address
Email of communicating author@institution.org (Heading 3 style)

This document provides formatting guidelines for abstract submission to LACA-ABCr 2025 and LAPDiC. The abstract is limited to one page and must contain text only. Figures and tables are not permitted.

You may use this file as a template, overwriting or pasting your content using unformatted or RTF text (if character formatting must be preserved). Please avoid using custom styles, and instead apply the designated styles as described.

The main body of your abstract must use the Body Text style (Arial 10 pt). Use italics for emphasis. Begin a new paragraph on a new line without indentation. Subscripts and superscripts (e.g., H₂O) and special characters (Greek symbols like α, ω; degrees °) must be correctly formatted.

References should be cited using square brackets [1], [2-4], [2,3] and listed at the end of the document without a heading, using Heading 4 style (Arial 9 pt). Number references in the order in which they appear in the text.
